

# **Welcome to Trading Accelerator, your intensive 8 weeks trading bootcamp** 🥷

My name is Brad Goh aka the greatest trading mentor of all time. I'm really excited to have you here so congratulations on taking the first step toward mastering the financial markets.

This program is designed to be your comprehensive guide, taking you step-by-step through the essential knowledge and skills needed to succeed as a trader. Over the next 8 weeks, I will be holding your hand and guiding you so you can go from zero to becoming a confident and skilled trader. Just treat me like your virtual mentor.

In the first week, you will discover the fundamentals of forex trading, understand currency pairs and other forex language and lingo.

Then in week 2, you will dive into the world of technical analysis where you will learn how to analyze the charts using market structure and supply and demand zones.

And in week 3, which could perhaps be the most important course module, you will learn Market Mechanics where you will be exposed to liquidity concepts, order blocks and other advanced profitable trading strategies like the golden fibonacci!

In these first 3 weeks, we basically teach you everything you need to know to start making money BUT what's the point of making money if you can't keep it which is why in week 4, you will learn the strategies to protect your capital and manage your risk like a professional.

In week 5, you will understand how global events, economic data, and news affect currency movements and trading opportunities. And in week 6, you will learn how to build a disciplined daily trading routine, from pre-market preparation to end-of-day analysis and journaling.

And in the last 2 weeks of the bootcamp, you will learn more about the most important part of trading - the mental game. You will discover how to manage your emotions when live trading and stay focused so you can operate at your fullest potential as a trader.

Each week is packed with valuable insights, practical exercises, and action steps to help you turn knowledge into results.

Now after the 8 core modules, you will be free to explore the bonus courses that we have in place for you - the 7 Figure Trader mindset course and Fastlane Crash Course which is a 6 hour long recording of the live masterclasses I have held with my students in my previous trading program.

Even though this is an intensive 8 week trading bootcamp, it does not mean that you need to complete the entire course within 8 weeks. You might have other commitments like working a 9 to 5 or kids to take care of, therefore, just go through the course in your own free time, just ensure that you dedicate at least 30 mins a day going through the lessons here. I can guarantee you that if you just put aside 30 mins a day to study the materials, your trading will improve drastically within 3 months.

I'll be honest with you, my goal with Trading Accelerator is not to teach you EVERYTHING I know about trading, it's to give you sufficient trading knowledge so you can make your first \$5,000 from trading. This way you will be able to afford my trading mentorship program, 1% Club.

That's where you will get coached by professional traders through 200+ in-depth lessons, daily coaching calls & weekly live trading sessions. That's where I will personally teach you how to become a consistently profitable 6 figure trader and make \$10k-\$30k/month consistently.

That's my secret motive behind the Trading Accelerator.

If you're ready to accelerate your trading journey and take your skills to the next level, let's get started—I'll see you in Week 1!
