Thank you FSP!!  
Your trading course is Awesome. So much information with payout strategies that I'm still trying to implement and grasp. However, the course helped me to learn my weakness, which is taking short teades. What do I mean, I am confident in long bull trades and severely lacking in short selling the market. Since listening to your videos I was able to learn your teachings, it imprinted in my brain, made me a believer and allowed me to execute the sort selling strategy. I now have another tool to make money in the markets. Thank you for changing my view of trading, rewriting my trading beliefs and the spirit of fire you bring into trading!!!  
Thank you for your guidance, dedication to answering our Q&A and building a strong community of teaders. (edited)

Pleasantly surprised with last payout. Apex salary plan has started. Dug into my buffer by \$500 for the last four payouts.

I'm here to say thanks to my man [@FSP](#). I started trading prop firms in August, and I had always traded personal accounts, which can make the transition tricky. I lost a couple of accounts just before payout and never really thought about building a PA Roster or anything like that. Since I joined the FSP Discord, I've completely changed the way I trade prop firms. His course made me approach prop firms differently, and with his strategy — the PA Roster, rotating accounts to maintain risk management — it completely changed my game. The strategy gave me more than I expected; I built my PA Roster, and the payouts just kept coming. Thanks, FSP!

@FSP Just wanted to say thank you! When I saw your video on using different accounts to work into a position, I knew it was the missing piece to my trading. I also incorporated the fast sweep into my FVG strategy and it has really turbo charged my trading. I got approved for five payouts and have four more ready to go. You da man!
