

How to Swing Trade Call and Put Options

Learn swing trading options strategies substituting a call option for a long stock position or a put option for a short stock position with price patterns

In this short course, we will describe and review using calls and puts with price patterns based on Master Trader Swing Trading Strategies.

This session will bring clarity to what confuses the majorities.

Swing trading stocks and options has a holding period of 2 – 10 days and is designed to generate income from capturing the bulk of the high-probability setups on daily charts.

Buying options requires significantly less capital than trading stocks, and can generate a terrific return on capital.

However, it requires the knowledge of price patterns based on Master Trader Technical Strategies for [Swing Trading](#) and the right Options to use.

Learn:

- Master Trader’s main chart patterns we use for swing trading stocks and options
- Master Trader’s approach in swing trading options and picking the right strike price and expiration date
- How to avoid the typical errors of novice option traders, and how to stack the odds in your favor
- How trading using Master Trader Strategies will dramatically increase your odds of success
- How we scan for new opportunities in real-time
