

Learn To Trade Professional Gaps Like a Pro

Gap trading offers a method of generating income with a signal method built with Master Trader Strategies.

Despite the market's bullishness or bearishness on any day

Master Trader finds high-probability gap setups to trade and ETFs regularly.

Gap trading offers a method of generating income with a signal method built with Master Trader Strategies.

Not all **gaps** are created equal – or tradable. Learn our favorite gap — Pro Gaps!

Candlesticks convey different messages of supply and demand that we use for **gap trading**.

We will review different types of gaps and define great gap trades form ones are not at all.

- Learn:**
- The Language and Setup of the *Pro Gap* and why they are one of our favorites to trade
 - The psychology behind the high-probability Setup, including how to read the messages on smaller time frames to enter
 - We will show you our steps to find great setups, then show you how we use the opening action to determine if and when to enter the trade, and how to manage it
 - We will review the morning's Gap List and show how you can profit each day in the *Master Trading Green Trading Room*
 - Trading Pro Gaps using Master Trader Strategies (MTS) applies to trading stocks, or an Index ETF.
