

Momentum Moves – How to Get On Board

Momentum traders go where the action is.

Momentum traders bet that prices will continue to moving to profit.

In this short course, we will describe and review how to recognize a momentum move and how to get on board intelligently.

It's happened to all of us. The setup is developing, you saw it coming but took your eyes off for a minute and then prices are running.

You missed the ideal entry for a long or short trade but it still has so much potential to profit because of the strength of the trend and a VOID.

The train has left the station and you're not on board. But how do you enter it intelligently with a generous reward-risk?

Assessing relative strength and weakness, multiple time frames, market internals, and inter-market analysis will help a lot.

Learn:

- How to recognize trend strength
- The factors to consider when entering a momentum move
- The exact patterns to use to objectively enter moving stocks and ETFs
- How to use Multiple Time Frames (MTM) and the Price Void to maximize reliability
- Watch us scan for new trade setups in Stocks and ETFs and discuss what to look for in trading them
- These setups using Master Trader Strategies (MTS) apply to trading any instrument
