Overview

What You'll Get From The One Bitcoin Club

Everyone wishes that they had a larger holding of Bitcoin, usually around the time that we get our once-every-two-year moon rally! So how do you get there, apart from being really lucky? This is why we created this course, to help provide a system for you to stack those sats!

As a student, you'll get a few great benefits from being here:

- **Access exclusive content.** We've designed The One Bitcoin Club to inspire, instruct, and engage...while creating the biggest stack in the shortest period of time.
- **Meet new people.** Your fellow students are as motivated as you are to stacking sats here at The One Bitcoin Club.
- **Get results.** As you dive into the course content and meet the community here in The One Bitcoin Club, you're on a path of mastery. While it's not necessarily easy, the transformation we'll get together matters.

How to Get the Most Out of The One Bitcoin Club

We're here to get results and we know you are too. Here's the best way for each of us to get there:

Be supportive. Encourage and support your fellow students. No one here is looking for your criticism, cynicism, advice, or judgement. (We can get those things on the rest of the Internet).

Share generously. Your stories and experiences may be exactly what another student needs to hear today to solve a problem or seize an opportunity.

Be constructive. We're here to push each other forward and lift each other up. Find ways to help each other think bigger, reframe challenges, and stay curious.

Don't spam, promote, or troll. The One Bitcoin Club exists to help you learn. It's not a place to spam, promote, or bully anyone else.

You're a Part of Something Bigger

By joining The One Bitcoin Club, you're also a member of ReadySetCrypto ONE, our overarching community. You'll be able to keep up with our The One Bitcoin Club activity both here, but also in your main ReadySetCrypto ONE Activity Feed (think about it as our own Facebook newsfeed with Course and other activity all in one place).

Let's get started.
