

Trading 1-2-3 Continuations for Maximum Profit

Technical analysis is used in all markets by traders and investors. Recurring Price Patterns like the 1,2,3 pattern and trend analysis increases your odds.

The Master Trader approach is to search for high probability Trading Setups with Multiple Time Frames in alignment.

In this short course, we will describe and review trading 1-2-3 for maximum profit.

This session will bring clarity to what confuses the majorities.

We are going to teach you a powerful continuation pattern – The Master Trader 1-2-3 Continuations -- and how to trade stocks and options on the best setups.

As you will see, the pattern can form in different ways - and that price patterns of the same name are not all created equally.

Other Master Trader technical concepts like the Void, Location of the pattern, recent support - resistance and more are covered.

Learn:

- The Setup of the Master Trader 1-2-3 Continuations and how to pick the best setups
- The psychology of the pattern and how they are being created with supply and demand
- Using Multiple Time Frames (MTF) to perfect entry
- Trading stocks and options on these setups for maximum returns
- Watch us scan for new trade setups and discuss what to look for to invest and trade in these setups
