

Trading Stocks & Options on News

News moves stocks daily – some in the anticipated direction, some not. But why?

The media talking heads often naively mask actual price movements with “some explanation.”

It is traders' Perceptions to the News that is important, NOT the news itself.

Master Trader is ONLY interested if News ignites GREED or FEAR.

News only directs us to the charts of interest; Price is King. We trade with or against the News – charts determine the actual trades.

Learn our approach on how to intelligently trade stocks and options on the best setups!

Learn:

- How to objectively trade stocks “in the news” and not get misled by the talking heads, rumors, or self-serving so-called “gurus”
- How to trade With or Against Earnings and other News headlines
- How to profit from trading other affected companies with our “Who will Benefit? Who will be Harmed?” approach
- When to intelligently “Buy the Rumor, Sell the News”
- Why selling options “in the news” with spiked volatility is highly profitable using Master Trader Strategies (MTS)
- Watch us scan the morning stocks in the news for new trade setups and discuss what to look for in trading stocks and options on them
